DETAILED ACTION

The IDS received 12/6/2004, 2/21/2007 have been entered.

Election

Applicant's election with traverse of Group IV, claims 23-27, in the reply filed on 2/21/2007, and election with traverse of specie: an inhibitor of adenylyl cyclase and 9-(tetrahydro-2'-furyl)adenine, in the reply filed on 4/24/2007 are acknowledged. The traversal is on the ground(s) that all groups share the special technical features of "inhibitor of adenylyl cyclase, an inhibitor of protein kinase A, and inhibitor of protein kinase C or an activator of Gi protein". This is not found persuasive because the above listed enzymes do not share one common inhibitor.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-22, 25-27 are considered nonelected because they drawn to nonelected species/claims and thus are withdrawn from further consideration.

Only claims 23-24 are presented for examination on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 23-24 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps,

Art Unit: 1657

such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: method steps involved in modulating such as monitoring the expression of certain enzyme; a correlating step to accomplish the preamble of the claim.

Conclusion

No claim is allowed.
